SUMMARY

UNSTOPPABLE. I BUILD. I SHIP. I SCALE A **passionate and hands-on Working Student in Development**, specializing in **React, TypeScript, and Next.js** to craft engaging and scalable digital experiences. My mastery extends to **independently developing frontend features, seamlessly integrating with backend systems, and owning the entire development lifecycle** in fast-paced environments. Driven by a relentless focus on **shipping impactful products**, I am eager to apply my skills to redefine the iGaming world at First Bananas.

EXPERTISE

Frontend Feature Development: Expert in React, TypeScript, and Next.js, with a hands-on mindset to **independently develop and implement engaging user interfaces and features** from concept to deployment.

API Integration & Backend Connectivity: Proficient in **connecting frontend components to robust backend systems**, including seamless API integration, secure authentication flows, and efficient data handling.

Ownership & Agile Execution: Strong sense of responsibility for the **full feature lifecycle**, from meticulous debugging and testing to rapid iteration and **shipping in fast-paced, collaborative team settings.**

User-Centric Design & Iteration: Committed to defining and delivering intuitive, user-facing functionality, with a focus on responsive design and continuous improvement

TECH STACK

Frontend: React , TypeScript , Next.js

Backend Concepts: Node.js , PostgreSQL, REST APIs, Authentication Flows, Data Handling

Version Control & Tools: Git, GitHub Actions , Custom Node.js Helper Modules

Cloud Platforms: GCP (foundational knowledge)

PROJECTS   Jun '25 - Present

- **Independently developed and implemented the entire frontend** for a high-octane e-commerce application using **React, TypeScript, and Next.js**, creating a highly engaging and scalable digital experience .
- **Seamlessly connected frontend components to complex backend systems**, including robust API integrations for product data, user authentication, and payment processing.
- **Actively debugged, tested, and iterated on new and existing features**, ensuring high performance, scalability, and a smooth user experience in a fast-paced, self-driven development environment .
- **Demonstrated real ownership and responsibility** for a live project, focused on **shipping impactful user-facing functionality** that redefines online shopping .
- **Live Project:** http://login.sherin.fun

INTERNSHIPS

Software Development & IT Support Intern Freelance Projects   Jun '22 - Dec '22

Freelance Projects   Pune

- Fortified IT security by configuring advanced access control policies and deploying critical security patches, proactively strengthening system defenses.
- Provided expert support in network administration and swiftly resolved complex IT security concerns, ensuring operational continuity.

EDUCATION

MS in Computer Science   Jul '22 - Present

IU International University of Applied Sciences   Berlin, Germany

WHAT DRIVES ME

- **OBSESSIVE CURIOSITY:** I don't just learn; I**devour, master, and then build upon new technologies**, particularly those poised to redefine **fast, engaging digital experiences in the iGaming world.** I am inherently driven to **exceed the expected and pioneer the unprecedented.**
- **EXTREME OWNERSHIP:** My commitment is **absolute. I own the entire feature lifecycle from concept to delivery**, ensuring every line of code contributes to building things that truly matter and delight users.
- **SPEED & EXECUTION:** I am a **catalyst for rapid innovation.** I don't just plan; I**execute at warp speed, developing and shipping tangible features weekly**, thriving in fast-moving, creative team environments that value execution and ownership.
- **Language Skills:** Fluent in English (C1-level) , Basic German (continuously improving).
- **Interests:** Keen interest in gaming, crypto, and mobile-first design principles.
